2026.04.03(FRI) 16:00 KST

Welcome

Welcome everyone! I'm so excited to have you in the course, and I hope these materials help you build both intuition and technical depth.

All lecture materials will be available on my personal homepage and on GitHub:

`https://github.com/red1108/lectures`

About Me

Hello, I am Mingyu Lee.

I am a fourth-year undergraduate from Seoul National University, currently an exchange student at UC Davis.

Personal homepage:
`https://red1108.github.io/`

LinkedIn:
`https://linkedin.com/in/red1108/`

Research Interests

I am studying quantum computation, quant trading, algorithms, and machine learning.

About This Course

Overview

- Major ideas in quantum algorithms
- Basic building blocks and frameworks
- Selected techniques with quantum complexity context
- Where quantum speedups may arise

Goals

- Build intuition for algorithms and complexity
- Learn several core quantum techniques
- Identify tasks that may benefit from quantum methods

About This Course

Plan

- 5–10 participants (Actually, 14)
- Basic background, around Grover search (I hope)
- 8 weeks

Notes Schedule can be adjusted to fit the group

Lecture Schedule

Date	Study content	Person in charge	Additional notes
4/3 Fri	**Quantum Complexity**	**Mingyu Lee**	**About oracle**
4/10 Fri	Quantum Amplitude Amplification	Mingyu Lee	Grover search quantum amplitude estimation
4/17 Fri	Quantum Min/Max Searching	Mingyu Lee	
4/24 Fri	Quantum Analog-Digital Conversion	Mingyu Lee	Swap test, k-NN
5/1 Fri	Quantum Walk	Mingyu Lee	
5/15 Fri	HHL	Mingyu Lee	recorded Zoom lecture
5/22 Fri	QSVT	Myeongjin Shin*	

Outline

1. Introduction
2. Example Content
3. References

Outline

1. Introduction
2. Example Content
3. References

What is this seminar?

- This is a starter Beamer deck for a new seminar.
- Theme and footer style follow your requested format settings.
- Contact information is placed on the title slide.

Outline

1. Introduction
2. Example Content
3. References

Example: Key Topics

Topics in Quantum Algorithms

- Quantum Fourier Transform (QFT)
- Phase Estimation
- Grover Search
- Hamiltonian Simulation

Example: Simple Formula Slide

For example, the Hadamard transform on one qubit:

$$H|0\rangle = \frac{|0\rangle + |1\rangle}{\sqrt{2}}, \qquad H|1\rangle = \frac{|0\rangle - |1\rangle}{\sqrt{2}}.$$

This template is ready to be extended with your seminar materials. [NC10]

Outline

1. Introduction
2. Example Content
